## Abstracts

According to our latest research, the global Explosion-proof Industrial Wireless Remote Control market size will reach USD 855 million in 2031, growing at a CAGR of 5.1% over the analysis period.

Explosion-proof Industrial Wireless Remote Control solutions engineered to prioritize safety in hazardous environments. Workplace environments where explosive gas, vapour or dust atmospheres may form must be equipped with Explosion-proof Industrial Remote Control, ie equipment that has an acceptable low risk of creating an ignition source.

Exploration and production and pipeline, transportation and storage processes. Moreover, the increasing number of accidents in midstream oil & gas industry is driving the explosion proof equipment market during the forecast period. For Instance: According to Pipeline and Hazardous Materials Safety Administration, over the last 30 years, the U S segment of the midstream oil and gas industry has experienced more than 9 000 significant pipeline related incidents which resulted in more than 2 500 injuries, 548 fatalities, and over \$8.5 billion in financial damages, thus creating demand for explosion proof equipment's. Furthermore, rising investments for the expansion of oil and gas production across the world owing to the rising energy demands also triggers the growth of the market. In December 2021, the Government of India planned to invest \$2.86 billion in the upstream oil and gas production to double natural gas production to 60 bcm and drill more than 120 exploration wells by the end of 2023. These major investments tend to bring significant growth in the demand of explosion proof equipment in Upstream Oil and Gas industry, further driving its market growth during the forecast period.
