The global Explosion-proof Wire Rope Electric Hoist market size is expected to reach \$ 770 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032).

Explosion-proof wire rope electric hoists are heavy-duty lifting equipment specifically designed for flammable and explosive hazardous environments. Through explosion-proof motors, sealed electrical systems, and high-strength wire rope structures, they achieve safe and stable material lifting and handling. This equipment is widely used in industrial sites where flammable gases, vapors, or dust are present to meet the demands for high safety and reliability. The industry chain of explosion-proof wire rope electric hoists includes upstream components such as wire ropes, motors, gearboxes, braking systems, explosion-proof electrical components, and control modules; midstream components include complete machine manufacturing and explosion-proof system integration, load testing, and quality inspection; and downstream applications cover oil and gas, chemical, mining, power, shipbuilding, and hazardous materials storage. Supporting services include installation and commissioning, safety certification, regular inspection, and maintenance. In 2025, the global production of explosion-proof wire rope electric hoists was approximately 30,000 units, with a global average market price of approximately US\$18,000 per unit. The gross profit margin of major companies in the industry ranges from 20% to 40%. In 2025, the global production capacity of explosion-proof wire rope electric hoists will be approximately 40,000 units.

The Explosion-proof Wire Rope Electric Hoist market is driven by strict safety regulations in hazardous industries such as oil and gas, chemicals, and mining. Increasing investments in energy infrastructure and industrial safety upgrades support steady demand. Manufacturers focus on improving explosion-proof standards, load capacity, and automation compatibility. As industrial safety awareness rises globally, demand for reliable and compliant explosion-proof lifting equipment is expected to grow

steadily.
