Explosion-proof scales or hazardous area scales are engineered specifically to minimize the risk of explosion when production materials and processes create potentially explosive environments. For example, in Zone 1 classified areas where explosive gas atmosphere is likely to occur during normal operation, it is important to have equipment with fully contained electronics so that there is no risk of sparking or heat accumulation that could set off an explosion. Explosion-proof electrical equipment can contain an explosion and extinguish the flame.

Global key players of Explosion-protected Balances and Scales include Mettler Toledo, Sartorius and Avery Weigh-Tronix, etc. The top three players hold a share over 38%. China is the largest market, has a share about 34%. In terms of product type, Platform Scales is the largest segment, occupied for a share of about 31%, and in terms of application, Chemical & Pharma has a share about 39 percent.
