The global Extenders market size is expected to reach \$ 10650 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

A wireless network uses radio waves to communicate with portable devices, granting them access to other connected devices and to the Internet. Many factors can affect the strength of these radio waves, and you may find dead spots in your office network where you cannot connect.

WiFi extenders are devices to improve WiFi coverage. It works by receiving your existing WiFi signal, amplifying it and then transmitting the boosted signal. With a WiFi repeater you can effectively double the coverage area of your WiFi network - reaching far corners of your home or office, different floors, or even extend coverage to your yard. Using Wi-Fi extenders, you can bridge these dead spots and provide a solid signal throughout your facility.

China is the largest market with about 52% market share, USA and Europe are follower, accounting for about 32% market share.

The main manufacturers are Linksys, ZyXEL, Gefen, Amped, Black Box, Belkin, Hawking Technology, ICron, NetComm Wireless, Securifi, ASUS, TP-LINK, Edimax Technology, NETGEAR, D-Link etc. TP-LINK is the largest manufacturer with about 26% market share.
