Abstracts

The global Extensible Paper market size is expected to reach \$ 6315.3 million by 2029, rising at a market growth of 5.3% CAGR during the forecast period (2023-2029).

Extensible paper is produced mechanically by compressing a paper web between a rubber blanket and a drying roller. The process produces a paper with a built-in stretch, which produces greater strength and permits fewer paper plies in a bag.

This report studies the global Extensible Paper production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Extensible Paper, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Extensible Paper that contribute to its increasing demand across many markets.
