Abstracts

According to our (Global Info Research) latest study, the global External Active Antenna market size was valued at US\$ 253 million in 2025 and is forecast to a readjusted size of US\$ 326 million by 2032 with a CAGR of 3.4% during review period.

In 2025, global External Active Antenna production reached approximately 27,333 k units?with an average global market price of around US\$ 9 per unit, and a gross profit margin of approximately 20%-40%. External Active Antennas are antenna modules installed outside devices or equipment and integrated with active components such as low-noise amplifiers, filters, RF circuits, cables, connectors, shielding structures, and protective housings. They are mainly used to receive and enhance GNSS, GPS, BeiDou, Galileo, GLONASS, cellular, Wi-Fi, satellite communication, or IoT signals. Compared with internal active antennas, external active antennas usually provide better sky visibility, stronger signal reception, easier mounting flexibility, and improved performance in vehicles, outdoor equipment, industrial systems, marine devices, drones, and precision positioning terminals. The industrial chain of External Active Antennas includes upstream ceramic patch elements, RF chips, low-noise amplifiers, filters, coaxial cables, connectors, shielding covers, PCBs, plastic housings, waterproof seals, magnetic bases, mounting brackets, adhesives, radomes, and testing equipment. The midstream includes antenna design, RF circuit integration, impedance matching, LNA tuning, cable assembly, housing sealing, waterproof testing, gain testing, noise figure testing, reliability testing, quality control, and certification. Downstream applications include automotive electronics, GNSS receivers, fleet trackers, drones, asset tracking devices, marine navigation, surveying equipment, smart agriculture, industrial positioning systems, and communication terminals. Related services include customization, tuning, certification support, integration testing, technical support, and

replacement parts.
