The global External Impact Crusher market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

An external impact crusher, also known as a horizontal shaft impact crusher (HSI), is a type of crushing equipment used in the mining and construction industries to reduce the size of rocks and other hard materials. Unlike a vertical shaft impact crusher (VSI), which utilizes a vertical impact force to break the material, an external impact crusher employs a horizontal shaft that rotates rapidly and imparts a high-speed impact on the material.

This report studies the global External Impact Crusher production, demand, key manufacturers, and key regions.
