According to our (Global Info Research) latest study, the global Extrusion Coating Laminating Machine market size was valued at US\$ 596 million in 2025 and is forecast to a readjusted size of US\$ 807 million by 2032 with a CAGR of 4.4% during review period.

In 2025, global extrusion coating laminating machine production reached approximately 4637 units, the average price is 125 k usd/unit. Extrusion Coating Laminating Machine is an industrial equipment which can melt plastic particles by heating, extrude them into uniform film through die, and immediately compound them with paper, fabric or plastic film under pressure. Its core technology is extrusion coating and hot pressing compound. The equipment mainly consists of plastic extrusion system, coating die head, compound pressure roller, unwinding and winding device and control system. It can form a layer of dense plastic film on the surface of substrate. Thereby, the material is endowed with excellent properties such as moisture resistance, oil resistance, sealing, enhancement or beautification of appearance and the like.

The gross profit margin of extrusion coating laminating machine is around 25%.
