According to our (Global Info Research) latest study, the global Eye Link Conveyor Belts market size was valued at US\$ 556 million in 2025 and is forecast to a readjusted size of US\$ 795 million by 2032 with a CAGR of 5.3% during review period.

Eye Link conveyor belts are open-type metal conveyor belts composed of eye-shaped links and crossbars. They offer excellent ventilation, drainage, and cleaning performance, making them suitable for processes such as cooling, drying, baking, cleaning, and freezing. These conveyor belts feature good dimensional stability, uniform load distribution, high temperature resistance, and corrosion resistance, and are widely used in food processing, chemical processing, heat treatment, and industrial manufacturing. The Eye Link conveyor belt industry chain includes upstream stainless steel wire, carbon steel wire, and surface treatment materials; midstream processes such as forming, stamping, assembly, heat treatment, and surface finishing; and downstream applications covering food processing lines, industrial furnaces, heat treatment equipment, cleaning systems, and material conveying equipment, along with installation, maintenance, and replacement services to ensure long-term stable operation. In 2025, the global production of Eye Link conveyor belts was approximately 12 million square meters, with a global average market price of approximately US\$45 per square meter. The gross profit margin of major companies in the industry ranged from 25% to 40%. In 2025, the global production capacity of Eye Link conveyor belts was approximately 16 million square meters.
