According to our (Global Info Research) latest study, the global Eye Mask market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Eye masks are special cutouts that contain all the ingredients you would see in your face masks along with extra nourishment and hydration for the thinner skin under your eyes. They are designed to deliver skincare ingredients to this delicate area with higher efficiency than creams due to the lower rate of evaporation of the serum/cream/concentrated essence because of the eye mask material on top.

The most popular kinds of eye masks in the market right now are sheet masks and hydrogel masks, both of which are drenched in unique serum concentrations which are then soaked by your under eye during application. However, hydrogel masks can hold more moisture than cotton masks and are known to be more potent in delivering the essential brightening and anti-ageing agents into the skin.
