Fabry disease is a rare X-linked lysosomal storage disorder with a deficiency of alpha galactosidase enzyme resulting in progressive organ dysfunction. This disease is caused by abnormal buildup of a specific fatty matter called globotriaosylceramide in multiple tissues of the body including eyes, skin, kidney, gastrointestinal system, brain, heart, and central nervous system.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs.
