Fast-acting migraine medications are a class of drugs specifically designed for the acute phase of migraine attacks, aimed at rapidly alleviating headache and associated symptoms such as nausea, vomiting, photophobia, and phonophobia. These products include prescription drugs such as triptans, ergot derivatives, and CGRP receptor antagonists, as well as over-the-counter medications like ibuprofen and acetaminophen, which are non-specific analgesics. Dosage forms cover tablets, orally disintegrating tablets, capsules, oral solutions, nasal sprays, and subcutaneous injections. The upstream supply chain involves active pharmaceutical ingredients, excipients, delivery devices, and packaging materials, while downstream customers mainly include hospital pharmacies, retail pharmacies, online prescription and OTC platforms, pharmaceutical wholesalers, and neurology or headache clinics. The overall industry gross margin typically ranges from 32% to 48%, with variations depending on drug category, prescription status, and distribution channels.
