Abstracts

According to our (Global Info Research) latest study, the global Fast Attack Craft market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Fast attack craft (FAC) are small, fast, agile, and attack-capable warships, which are armed with anti-ship missiles, guns, or torpedoes. FAC are generally operated in the coastal regions as they lack the defensive capabilities to survive in the blue waters. The major benefit of such ships over other warships is their affordability and speed. These boats, when armed with guided missiles, are capable of posing threats to even large capital ships.

The missile armed FAC segment accounted for the major shares and dominated this market. The low cost of these boats allows defense authorities to deploy a larger base of missile-armed FAC in their coastlines. The rising arms race and increasing sea-border threats that is inducing countries such as Iran, North Korea, Egypt, China, and India to add such fast attack ships to their naval inventories will drive market growth in the coming years.

The Global Info Research report includes an overview of the development of the Fast Attack Craft industry chain, the market status of National Defense (Missile Armed FAC, Non-Missile Armed FAC), Fighting (Missile Armed FAC, Non-Missile Armed FAC), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Fast Attack Craft.
