According to our (Global Info Research) latest study, the global Fault Indicators market size was valued at USD 174.8 million in 2023 and is forecast to a readjusted size of USD 197 million by 2030 with a CAGR of 1.7% during review period.

Fault Indicators are devices which indicate the passage of fault current. When properly applied, they can reduce operating costs and reduce service interruptions by identifying the section of cable that has failed. At the same time, fault indicators can increase safety and reduce equipment damage by reducing the need for hazardous fault chasing procedures.

Global Fault Indicators key players include SEL, Horstmann, ABB(Thomas & Betts), SEMEUREKA, CREAT, etc. Global top five manufacturers hold a share about 50%.

Europe is the largest market, with a share about 30%, followed by North America and China, both have a share over 50 percent.

In terms of product, Overhead Line Fault Indicators is the largest segment, with a share about 55%. And in terms of application, the largest application is Short-circuit and Earth Fault Indicators, followed by Earth Faults Indicators.
