The global Feedstuff market size is expected to reach \$ 759594 million by 2032, rising at a market growth of 2.2% CAGR during the forecast period (2026-2032).

Feedstuff refers to raw materials and processed products used in the formulation of animal feed for livestock, poultry, and aquaculture. It includes energy feedstuffs such as corn and wheat, protein feedstuffs like soybean meal and fishmeal, as well as feed additives including amino acids, vitamins, minerals, and functional ingredients.

Feedstuff plays a critical role in determining animal growth performance, feed conversion efficiency, health status, and product quality, making it a foundational component of the global animal husbandry and aquaculture industries. In 2025, global Feedstuff sales reached approximately 1,460.45 million tons, with an average price of 420 US\$/Ton.

The growth of the feedstuff market is primarily driven by the continuous expansion of global livestock and aquaculture production, fueled by rising demand for animal protein as population growth, urbanization, and income levels increase. Shifts in dietary structures toward higher consumption of meat, dairy, eggs, and aquatic products are directly boosting feed demand.

This report studies the global Feedstuff production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Feedstuff and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
