Ferric Glycerophosphate is a chemical substance in the form of white powder. Ferric glycerophosphate is an easily absorbed organic iron supplement mainly used to prevent and treat iron deficiency anemia. It increases hemoglobin levels by improving the bioavailability of iron and does not interfere with the body's absorption of other trace elements, thereby further improving its bioavailability. Ferric glycerophosphate has a wide range of applications in fields such as food and medicine, and the market capacity is expected to continue to expand.
