Abstracts

Ferrite cores is a type of magnetic core made of soft ferrite. Soft ferrite is an iron-oxide-based soft magnetic material. This material features high electrical resistance and outstanding magnetic characteristics in high-frequency range although saturation flux density is slightly lower than other soft magnetic materials.

Scope of the Report:

This report focuses on the Ferrite Cores in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. At present, the world's production of ferrite cores is mainly concentrated in Asia. The major producing countries are Japan and China. In Japan, ferrite cores industry is generally at a more advanced level. Meanwhile, the manufacturers have more advanced equipment, strong R & D capability, the technical level is in a leading position. Compared with Chinese companies, foreign companies' manufacturing cost are relatively higher. With the improvement of production technology in China Ferrite Cores industry, their share in the international market is increasing and competitiveness in the international market gradually increase.

China ferrite cores industry has developed into a national industry with improvement in research and production. Currently China has become the largest ferrite cores consumption country, but the production technology is relatively following behind, because most manufacturers can only produce some low-end products. Although the new production lines is increasing, the high-end product is still relying on import.

Currently, the global main competitors of ferrite cores are: TDK(EPCOS), Magnetics, Hitachi Metals Group, DMEGC, ACME, KYCC, TDG, whose production market share is less than 40%, while most production are occupied by other more than one hundred of Chinese manufacturers who have one or two kiloton manufacturing capacity of ferrite cores.

With the rapid growth of the national economy as well as the rapid development of downstream industries, consumer electronic products keep stable growing in China, The automobile electronics is also growing in the downturn global economy situation. Chinese Ferrite Cores market demand is exuberant, which provides a good opportunity for the development of Ferrite Cores market and technology.

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area. In the future, there will still be more new investments entering the field.

Although Ferrite Cores brings a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.

The worldwide market for Ferrite Cores is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
