Abstracts

The global Ferrous Castings market size is expected to reach \$ 616890 million by 2032, rising at a market growth of 5.7% CAGR during the forecast period (2026-2032).

Casting is a process in which a liquid metal is somehow delivered into a mold that contains a hollow cavity of the intended shape. The metal and mold are then cooled, and the metal part (the casting) is extracted. Casting is most often used for making complex shapes that would be difficult or uneconomical to make by other methods. Ferrous Metals mostly contain Iron. They have small amounts of other metals or elements added, to give the required properties. Ferrous Metals are magnetic and give little resistance to corrosion.

Global Ferrous Castings key players include ThyssenKrupp, Doosan Heavy Industries & Construction, Weichai, Hitachi Metals, Xinxing Ductile Iron Pipes, etc. Global top five manufacturers hold a share nearly 15%.

China is the largest market, with a share over 40%, followed by India and Europe, both have a share about 25 percent.

In terms of product, Gray Iron Castings is the largest segment, with a share over 55%. And in terms of application, the largest application is Machinery and Equipment, followed by Motor Vehicles, Pipe and Fitting, etc.

This report studies the global Ferrous Castings production, demand, key manufacturers, and key regions.
