Abstracts

The global Ferrous Slag market size is expected to reach \$ 21610 million by 2032, rising at a market growth of 6.1% CAGR during the forecast period (2026-2032).

This report studies the Ferrous Slag market. Slag is a broad term covering all non-metallic co products resulting from the separation of a metal from its ore, its chemistry and morphology depends on the metal being produced and the solidification process used. Slags can be broadly categorized as ferrous (iron/steel) and non-ferrous (copper, lead/zinc) depending on the industry from which they come. Depending on the iron and steel production process different slag types can be manufactured like blast furnace slag, basic oxygen furnace slag, electric arc furnace slag, secondary metallurgical slag and other slags.

North America and Europe are the largest producer of Ferrous Slag, with about 30% market share respectively. NSSMC, Levy, ArcelorMittal, CRH and JFE are the top 5 manufacturers of industry, and they had about 65% combined market share.

This report studies the global Ferrous Slag production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Ferrous Slag and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
