According to our (Global Info Research) latest study, the global Ferrous Slag market size was valued at USD 12090 million in 2023 and is forecast to a readjusted size of USD 18100 million by 2030 with a CAGR of 5.9% during review period.

This report studies the Ferrous Slag market. Slag is a broad term covering all non-metallic co products resulting from the separation of a metal from its ore, its chemistry and morphology depends on the metal being produced and the solidification process used. Slags can be broadly categorized as ferrous (iron/steel) and non-ferrous (copper, lead/zinc) depending on the industry from which they come. Depending on the iron and steel production process different slag types can be manufactured like blast furnace slag, basic oxygen furnace slag, electric arc furnace slag, secondary metallurgical slag and other slags.

North America and Europe are the largest producer of Ferrous Slag, with about 30% market share respectively. NSSMC, Levy, ArcelorMittal, CRH and JFE are the top 5 manufacturers of industry, and they had about 65% combined market share.
