Abstracts

According to our (Global Info Research) latest study, the global FIBC Bulk Bag market size was valued at US\$ 12332 million in 2025 and is forecast to a readjusted size of US\$ 17397 million by 2032 with a CAGR of 5.2% during review period.

In 2025, global production of FIBC bulk bags reached 2.35 billion units, with an estimated average selling price of US\$5.1 per unit. FIBC bulk bags are large-capacity flexible industrial packaging containers used for the storage, handling, and transportation of powdery, granular, flake, or other free-flowing solid materials. They are typically made of polypropylene (PP) flat filament woven fabric and are equipped with features such as straps, inlet ports, outlet ports, linings, coatings, leak-proof seams, or anti-static structures. Applications cover chemical, fertilizer, plastic resin, grain, food ingredients, pharmaceutical raw materials, mineral powders, cement and building materials, agricultural products, feed, pigments, metal powders, lithium battery materials, waste disposal, and cross-border bulk logistics. The upstream of the industry chain mainly includes PP resin, PP flat yarn, UV stabilizers, masterbatches, antistatic agents, conductive yarn/static dissipative yarn, PE/aluminum foil/EVOH lining film, sewing thread, straps, labels, inks, and pallets; the midstream includes drawing, weaving, coating, laminating, printing, cutting, sewing, lining assembly, static/load/drop testing, and finished product inspection; the downstream industries include chemicals, agriculture, food, pharmaceuticals, mining, building materials, plastics, logistics warehousing, and recycling. Gross profit margins range from approximately 20% to 35%.

Globally, the Asia-Pacific region is a major manufacturing base and important consumer market. China and India, among others, possess advantages in PP weaving, sewing, export, and cost, primarily serving the agricultural, chemical, building materials, mineral,

and plastics packaging industries. North America and Europe are high-value demand markets, where customers prioritize food-grade, pharmaceutical-grade, UN hazardous materials packaging, electrostatic safety, clean production, traceability, and supply chain compliance, mainly supported by agricultural exports, safety regulations, and industrial packaging demand. The Middle East, Latin America, and Africa currently have a smaller market share, but driven by exports of petrochemicals, fertilizers, mining, cement, food, and agrochemicals, they still possess medium- to long-term growth potential. In the future, FIBC bulk bags will continue to upgrade from low-cost ordinary ton bags to lightweight, high-strength PP fabrics, food/pharmaceutical grade clean packaging, UN hazardous materials certification, antistatic and conductive safety bags, moisture-proof barrier bags with inner linings, recyclable/regenerated PP materials, automated sewing, QR code traceability, and regionalized delivery.
