According to our (Global Info Research) latest study, the global Fiber Fused Taper Coupler market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Fiber Fused Taper Coupler is to bundle two or more optical fibers together, and then melt and stretch them on the tapering machine, and monitor the change of splitting ratio in real time. After the splitting ratio meets the requirements, the melting and stretching ends, and one end of the fiber is reserved (The rest are cut off) as the input end, and the other end is used as the multi-channel output end. The fused tapered fiber coupler has the characteristics of good temperature characteristics, small size, simple process, and low production cost.
