Fiber laser cutting service is a type of laser cutting service that uses a high-powered fiber laser to cut through various materials. The fiber laser generates a concentrated beam of light that is directed onto the material, causing it to melt or vaporize and create a precise cut. This service is commonly used in industries such as manufacturing, automotive, aerospace, and electronics to cut materials like metal, plastic, wood, and composites. Fiber laser cutting offers high precision, speed, and versatility, making it an efficient and cost-effective method for cutting complex shapes and designs.
