Fiber laser glass drilling machine is a high-precision equipment that uses fiber laser technology to drill holes in glass materials. It forms local high temperature on the glass surface through a focused high-energy laser beam, quickly melts or evaporates the glass material to achieve the purpose of drilling. The equipment is usually equipped with a precise motion control system and a laser power adjustment device to ensure the accuracy of the drilling position and the controllability of the aperture size. The advantages of fiber laser glass drilling machine are its fast processing speed, wide aperture range, high processing accuracy, and small heat-affected zone on glass materials. It is suitable for high-efficiency and high-precision glass processing needs.
