This report studies the Fiber Laser market. A fiber laser or fiber laser is a laser in which the active gain medium is an optical fiber doped with rare-earth elements such as erbium, ytterbium, neodymium, dysprosium, praseodymium, thulium and holmium. They are related to doped fiber amplifiers, which provide light amplification without lasing. Fiber nonlinearities, such as stimulated Raman scattering or four-wave mixing can also provide gain and thus serve as gain media for a fiber laser.

Scope of the Report:

This report focuses on the Fiber Laser in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. In the coming years there is an increasing demand for Fiber Laser in the regions of North America and Europe that is expected to drive the market for more advanced Fiber Laser. Increasing of downstream industry fields expenditures, more-intense competition, launches in introducing new products, increasing of spending on general industry, retrofitting and renovation of old technology, increasing adoption of Fiber Laser will drive growth in China markets.

Globally, the production of CW fiber laser is concentrated, as the development and manufacturing technology is still high. IPG Photonics holds the lion's share of global fiber laser industry with its industry top technology status. Over the past years, the development of low power and small fiber laser has achieved remarkable market in China. The production volume of these low end fiber laser in China is growing quite fast. But the production value of these low end fiber laser is not high.

The consumption volume of Fiber Laser is related to downstream industries and global

economy. As there will be many potential market for Fiber Laser, the prospect of Fiber Laser is still be full of hope.

The worldwide market for Fiber Laser is expected to grow at a CAGR of roughly 12.6% over the next five years, will reach 3420 million US\$ in 2023, from 1680 million US\$ in 2017, according to a new GIR (Global Info Research) study.
