## Abstracts

The global Fiber Optic Loopback Cables market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

It also known as a loopback adapter or loopback plugs, this network equipment works by connecting adjacent pairs of network ports. The resulting loopback signal makes it easy to perform a fiber optic loopback test on fiber wires and equipment. We carry both singlemode and multimode loopback plugs and we have a variety of loopback testers for different connector types in order to make sure any kind of network is working as intended.
