Abstracts

Fiber to the x (FTTX) or fiber in the loop is a generic term for any broadband network architecture using optical fiber to provide all or part of the local loop used for last mile telecommunications. As fiber optic cables are able to carry much more data than copper cables, especially over long distances, copper telephone networks built in the 20th century are being replaced by fiber.

SCOPE OF THE REPORT:

This report studies the Fiber to the x market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Fiber to the x market by product type and applications/end industries.

The FTTx market in APAC is expected to grow at the highest CAGR during the forecast period. Increasing demand for broadband, especially in APAC countries such as China and India, which account for about one-third of the world's population, is likely to drive the FTTx market in APAC during 2018-2025. In APAC, the residential vertical is expected to witness strong demand for FTTx owing to the increasing requirement of fiber networks to overcome shortcomings such as narrow bandwidth, data overwhelming, interference, and higher maintenance and operating costs of copper networks. The major factor affecting/hindering the growth of the FTTx market is high installation cost.

The global Fiber to the x market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in

China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Fiber to the x.
