According to our (Global Info Research) latest study, the global Fiberglass Woven Roving market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Fiberglass roving is made of hundreds of tiny glass filaments. The roving is eventually reinforced with a chemical binding material to create a protected cohesive strand. The term “roving” can refer to the actual process of bundling such materials together, or the finished roll of strands.

Currently, APAC is the largest consumer of fiberglass roving. China, Japan, and India are the major fiberglass roving markets in APAC due to the growing wind energy, construction & infrastructure, pipes & tanks, and electrical & electronics industries. The fiberglass roving market in APAC is also projected to register the highest CAGR during the forecast period. The growing demand for environmentally-friendly products as well as stringent emission control policies has made APAC the largest fiberglass roving market.
