Fighter aircraft are the most advanced aerial platform within the sphere of military hardware because of its design, speed, and weaponry.

Scope of the Report:

This report focuses on the Fighter Aircraft in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

These aircraft enable airborne dominance and neutralization of enemy fighter planes, and they intercept/target enemy bombers. The global fighter aircraft market is dominated by manufacturers in the US, China, and Russia. However, since the past decade, there have been increasing developments from countries such as France, Israel, and India as well.

In terms of geography, EMEA accounted for the maximum market share and will continue to dominate the market for the next few years. One of the major factors that drive the market's growth in the region is the growing influx of illegal immigration from countries such as Syria and Lebanon into European countries that escalates the risk of internal insurgency and extremist attacks.

The worldwide market for Fighter Aircraft is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
