According to our (Global Info Research) latest study, the global Filter, Regulator, and Lubricator Assemblies market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Filter, regulator, and lubricator (FRL) assemblies are widely used in compressed air systems. Compressed air is mainly used in industrial applications as it is readily available and simple to use, but it can be the most expensive form of energy. Improper or unregulated use of compressed air can result in increased energy consumption and can increase the wear on equipment, which might result in higher maintenance costs and shorter tool life.

The oil and gas segment accounted for the major shares of the filter, regulator, and lubricator assemblies market. However, the food and beverage segment will lead this market due to the growing urbanization and the rising health awareness among individuals that leads to an increase in the consumption of healthy and ready-to-eat food products. These factors will contribute to the rise in sales of equipment such as air compressors used in the food and beverage industry which will drive the growth of the market.
