According to our (Global Info Research) latest study, the global Fin Seal Overwrapping Machine market size was valued at USD 1570.5 million in 2023 and is forecast to a readjusted size of USD 2330.3 million by 2030 with a CAGR of 5.8% during review period.

Fin seal overwrapping is a method of folding overlapping films horizontally and vertically and heat sealing the film.

Fin seal packaging gets its name from the distinctive flap that runs along the bottom of the finished product. The flap lies flat on the package until someone starts to open it, and the fins stand up like a shark's dorsal fin. This will give the package a higher seal, allowing consumers to easily open the package when the tear strip is included. This fin-shaped overwrapping offers a more cost-effective method of loosely containing pre-packaged items or printed materials within clear, opaque or printed tamper-resistant media.

Fin Seal Overwrapping Machine is capable of producing Fin seal packaging, which is widely used in the packaging process of consumer goods and other retail products.

Syntegon is the world's largest manufacturers of the Fin Seal Overwrapping Machine with a market share of about 11%.
