Abstracts

The global Financial Leasing market size is expected to reach \$ 2522700 million by 2032, rising at a market growth of 5.7% CAGR during the forecast period (2026-2032).

A financial lease is a method used by a business for acquisition of equipment with payment structured over time. To give proper definition, it can be expressed as an agreement wherein the lessor receives lease payments for the covering of ownership costs. Moreover, the lessor holds the responsibility of maintenance, taxes, and insurance.

A financial lease is similar to an out-and-out purchase transaction which has been financed through a term loan, in that the payments are made on a monthly basis. However, unlike an out-and-out purchase transaction in that the lessee doesn't present the obligated balance as debt, shows payments as expensed, and retains the equipment title. During the lease period, the finance company is considered as the legal owner of the asset.

CDB Leasing, ICBC Financial Leasing, BOC Aviation, Minsheng Financial Leasing and CMB Financial Leasing are the key players of Financial Leasing, with about 3% market shares.

North America is the world's most mature market, Enjoyed about 35% financial lease market share.
