## Abstracts

Diffusers are known as aeration installation equipment that finds its place in wastewater treatment plants. The air created by the blower is given in the form of fine bubbles in the aeration tank, thanks to the said diffusers. Today, diffusers come up with different types depending on the material quality or the purpose of use. One of these types is the disc diffusers, which are widely used today. Disc diffusers get their name from their direct form. Disc diffusers are the most common type in water treatment plants. We can say that the efficiency is extremely high, especially in terms of oxygen transfer.
