Feed phytobiotics are plant derived products. They improve feed performance when added to feed. Feed phytobiotics are derived from roots, spices, tubers, herbs, and other plant sources. Feed phytobiotics stimulates the secretion of digestive enzymes and helps in immune stimulation and holds a good anti-microbial, anti-bacterial, antiviral, and antioxidant properties. These phytobiotics are commonly available in solid, dried, and ground forms. They not only improve feed quality, but also animal health by reducing livestock diseases.

Feed phytobiotics serves as natural growth promoters (NGPs) due to its natural origin and is gaining popularity among the poultry feed additives owing to their beneficial effects on immune system and livestock growth performance.
