A finishing trowel is a plasterer's tool used for leveling concrete surfaces during construction work. It is typically thick, heavy, and sturdy, designed to submerge the coarse aggregate in concrete (gravel), resulting in a smooth and visually appealing surface.

Hold the finishing trowel lightly, like an egg, with a small space between the handle and your palm. Use the trowel with your whole body, applying weight to its neck for effective pressing. Start with the trowel slightly angled and gradually move it sideways for a smooth concrete finish.
