## Abstracts

The global Fintech App market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

With the increasing use of smartphones, fintech apps are being developed with a mobile-first approach to provide a seamless user experience on mobile devices. Fintech apps are incorporating personalization features to cater to individual user preferences and needs. This includes personalized recommendations, customized dashboards, and tailored financial advice. Artificial intelligence and machine learning technologies are being integrated into fintech apps to automate processes, improve fraud detection, and provide personalized financial insights. Fintech apps are leveraging open banking APIs to provide users with a consolidated view of their financial information from multiple accounts and institutions. This allows for better financial management and easier integration with other financial services
