Abstracts

The global Fire Barrier Sealant market size is expected to reach \$ 960 million by 2032, rising at a market growth of 3.6% CAGR during the forecast period (2026-2032).

Fire barrier sealants are specific type of sealants that help avert the spread of fire. They prevent the fire from spreading by sealing openings to fire-rated interiors of a building construction, floors, ceilings or wall assemblies. They are possessing fire resistant properties with exceptional longevity, as well as greatly reducing the formulation of smoke and other harmful toxins. They could also additionally act as an acoustic barrier by reducing the transfer of noise. Fire barrier sealants are paintable, and can also be easily cleaned with water.

3M Company, Hilti, Rockwool, H. B. Fuller, and Bostik (Arkema) are the leading manufacturers of Fire Barrier Sealant. 3M Company is the largest manufacturer, with about 25% of the market share.

North America is the largest production region with a market share of about 40%, followed by Europe with a market share of about 25%.
