Abstracts

The global Fire Damper for Marine market size is expected to reach $ 143 million by 2032, rising at a market growth of 6.9% CAGR during the forecast period (2026-2032).

Fire Damper for Marine is a fire-protection device installed in a ship’s ventilation or HVAC ductwork. Under normal operating conditions, the damper remains open to permit airflow. When a fire is detected—or when it is manually or remotely activated—it closes to restrict the passage of flame, heat and combustion products through the ventilation system.

Its primary function is to maintain the fire integrity of fire-rated bulkheads, decks and compartment boundaries, thereby containing a fire within its zone of origin. A fire damper does not extinguish the fire; it isolates ventilation paths that could otherwise spread the fire between compartments. This definition is consistent with the terminology adopted by the International Maritime Organization under SOLAS fire-protection provisions.

Market Drivers

1. Mandatory SOLAS and classification compliance

The strongest market driver is regulatory rather than discretionary. SOLAS requires ships to be divided into fire zones and establishes requirements for fire containment, smoke control, ventilation-system shutdown and the protection of escape routes. Classification societies and flag administrations verify compliance during newbuilding approval, periodic surveys and port State control inspections.

2. Growth of global shipbuilding and fleet renewal

Every new SOLAS-class vessel requires a fire-compartmentation and ventilation-isolation system. Demand is particularly strong for vessels with large accommodation blocks, multiple fire zones or complex ventilation networks, such as cruise ships, ferries, LNG carriers, container ships, naval vessels and offshore units.

UNCTAD continues to identify shipbuilding, fleet development and fleet renewal as core components of the global maritime transport industry. Maritime shipping carries more than 80% of global merchandise trade, sustaining a large installed base of vessels requiring fire-safety equipment throughout their service lives.

Report Scope

This report studies the global Fire Damper for Marine production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Fire Damper for Marine and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Fire Damper for Marine that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Fire Damper for Marine total production and demand, 2021-2032, (K Units)

Global Fire Damper for Marine total production value, 2021-2032, (USD Million)

Global Fire Damper for Marine production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Units), (based on production site)

Global Fire Damper for Marine consumption by region & country, CAGR, 2021-2032 & (K Units)

U.S. VS China: Fire Damper for Marine domestic production, consumption, key domestic manufacturers and share

Global Fire Damper for Marine production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (K Units)

Global Fire Damper for Marine production by Type, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

Global Fire Damper for Marine production by Application, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

This report profiles key players in the global Fire Damper for Marine market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Swegon (Actionair), Heinen & Hopman, TROX, Halton, Wozair, BSB Engineering, Eindec, Teknotherm Marine, Greenheck, Sagicofim, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Fire Damper for Marine market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), volume (production, consumption) & (K Units) and average price (US$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
