Abstracts

The global Fire Fighting Robot market size is expected to reach \$ 1912 million by 2032, rising at a market growth of 12.0% CAGR during the forecast period (2026-2032).

The Fire Fighting Robot is evolving from a niche unmanned device into a core platform for hazardous fireground operations. In the traditional market definition, Fire Fighting Robot products mainly refer to ground-based mobile platforms, including tracked, wheeled, legged/quadruped and other specialized ground configurations. Typical payloads include water monitors, foam monitors, ventilation units, thermal imaging cameras, gas detectors, lighting systems, robotic arms and communication relay modules. Commercially, the Fire Fighting Robot is not merely a robot chassis; it is a system-level product combining mobility, firefighting payload, sensing, remote control, field deployment, training and maintenance. The primary value lies in reducing firefighter exposure, extending front-line operating time and improving situational awareness in high-risk environments.

By 2025 revenue, the Top 5 suppliers were Magirus, Rosenbauer, CITIC Heavy Industry Kaicheng Intelligent Equipment, Mitsubishi Heavy Industries and Textron Systems, with a combined share of approximately 31.7%. By 2025 volume, the Top 5 suppliers were Magirus, Rosenbauer, CITIC Heavy Industry Kaicheng Intelligent Equipment, DEEP Robotics and Zoomlion Heavy Industry Science and Technology, with a combined share of approximately 26.3%.

Asia-Pacific is the largest regional market for Fire Fighting Robot products by volume. In 2025, Asia-Pacific recorded 3,569 units, accounting for 51.46% of global volume, significantly ahead of North America at 20.76% and Europe at 20.07%. Demand in Asia-Pacific is driven by fire rescue forces, petrochemical and chemical operators, power

infrastructure, energy storage facilities, rail transit, underground spaces and industrial parks. Chinese suppliers are competitive in mid-range tracked Fire Fighting Robot products, quadruped reconnaissance platforms and scenario-based integrated solutions. North America and Europe have smaller volume shares, but they maintain stronger positions in high-end heavy-duty, explosion-proof, modular and high-flow Fire Fighting Robot systems.

Tracked Fire Fighting Robot products remain the dominant product category. In 2025, tracked platforms reached 4,793 units, accounting for 69.1% of global volume, and generated USD 531.56 million, accounting for 72.4% of global revenue. Tracked platforms offer stronger mobility and stability in debris, slopes, wet surfaces, foam-covered areas and industrial fireground conditions, making them the primary choice for suppression, reconnaissance, ventilation, hose towing and tank cooling. Wheeled Fire Fighting Robot products accounted for 15.0% of 2025 volume and are more suitable for industrial parks, warehouses, airports and tunnels with structured surfaces. Legged/quadruped Fire Fighting Robot products accounted for 11.0% of 2025 volume but are expected to achieve a 23.96% volume CAGR from 2026 to 2032, supported by indoor reconnaissance, stair mobility, remote guarding, gas detection and thermal imaging applications.

Application demand is shifting from single-point fire suppression to broader safety and emergency-response coverage. In 2025, fire rescue forces and government emergency departments represented the largest volume segment, with 3,257 units and a 46.96% share. Petrochemical, chemical, oil & gas and hazardous-materials operators accounted for 1,821 units and a 26.26% share, but their revenue weight was higher due to more stringent requirements for explosion-proof design, high-flow suppression, heat resistance, long-distance communication and system integration. Energy, power, energy storage and data centers represented 11.04% of 2025 volume and are emerging as a high-growth segment. Rail transit, tunnels and underground facilities are more project-driven, while other applications include airports, ports, ships, manufacturing, warehousing, defense and wildland ground firefighting.
