Abstracts

Pump controllers are one of the equipment controllers and have control panels that monitor the operations of pumps. They monitor the flow of any substance within pumps. The flow being monitored can be controlled to achieve the desired flow rate. Controllers are devised to autonomously turn on and off the pumps that they are controlling. This functionality is undertaken based on the requirement. Controllers are also responsible for the motor speed as well as the pressure required within pumps.

Scope of the Report:

This report focuses on the Fire Pump Controllers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The industrial and commercial sectors primarily use the electrical fire pump controller influenced by the government initiatives to reduce the consumption of fossil fuels. Additionally, the electric fire pump controllers require less add-on time, less human intervention, and have an instantaneous response time.

Rising incidences of fire hazards in industries, stringent fire regulations, and rapid industrialization will influence the demand and utilization of fire pump controllers in the industrial segment. Several Industries such as oil and gas, power, mining, and petrochemicals are highly prone to fire hazards as they primarily use flammable materials in the diesel engine fire pump controllers market.

The worldwide market for Fire Pump Controllers is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
