According to our (Global Info Research) latest study, the global Fire Pump Controllers market size was valued at USD 1283.8 million in 2023 and is forecast to a readjusted size of USD 1809.4 million by 2030 with a CAGR of 5.0% during review period.

Pump controllers are one of the equipment controllers and have control panels that monitor the operations of pumps. They monitor the flow of any substance within pumps. The flow being monitored can be controlled to achieve the desired flow rate. Controllers are devised to autonomously turn on and off the pumps that they are controlling. This functionality is undertaken based on the requirement. Controllers are also responsible for the motor speed as well as the pressure required within pumps.

The industrial and commercial sectors primarily use the electrical fire pump controller influenced by the government initiatives to reduce the consumption of fossil fuels.
