Abstracts

Fire pump drive power is a kind of device which provide power for the fire pump. The fire pump drive power includes electric motor, diesel engine and petrol engine.

Scope of the Report:

This report focuses on the Fire Pump Drive Power in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

There are generally three types of drive power used for fire pump, which include diesel engine, petrol engine and electric motors. Petrol motors are commonly used for portable fire pump and light duty firefighting. The main manufacturers of petrol motors for fire pumps include Honda, Briggs & Stratton and other regional brands. Diesel engines are suitable for firefighting application in factory, building, pier and other high capacity fire pumps. Worldwide, the main manufacturers of diesel engines are Clarke, Cummins and Caterpillar. The three enterprises are famous in the fire pump industry because of wonderful product performance and related services. Electric motors are the most widely used drive power for fire pumps, which is efficient and convenient. There are large number of manufacturers of electric motors those can be used on fire pump.

Currently, North America is the largest production region of fire pump drive power based on revenue; in 2016, North America holds about 38% revenue share of global fire pump drive power. It is followed by Europe and Japan, which respectively have around 29% and 15% of the global total industry. Other countries have a small amount of production. Geographically, China has been the the largest consumption market in the world since 2014, which took about 26.5% of the global consumption volume in 2016.

For price trend analysis, a key variable in the performance of fire pump drive power producers is raw material costs, specifically the speed at which any increase can be passed through to customers. Over the past five years, the price of fire pump drive power has experienced a reducing trend.

For forecast, the global fire pump drive power revenue would keep increasing with annual growth rate with 3~5%, and a little higher speed in China and South Asia. We tend to believe that this industry still has a bright future, considering the current demand of firefighting.

The worldwide market for Fire Pump Drive Power is expected to grow at a CAGR of roughly 3.7% over the next five years, will reach 390 million US\$ in 2023, from 320 million US\$ in 2017, according to a new GIR (Global Info Research) study.
