The global Fire Pump market size is expected to reach \$ 2052 million by 2032, rising at a market growth of 3.7% CAGR during the forecast period (2026-2032).

A fire pump is a part of a fire sprinkler system's water supply and can be powered by electric, diesel or steam. The pump intake is either connected to the public underground water supply piping, or a static water source (e.g., tank, reservoir, lake). The pump provides water flow at a higher pressure to the sprinkler system risers and hose standpipes.

Global 5 largest manufacturers of Fire Pump are Pentair, NAFFCO, Grundfos, Flowserve and Sulzer, which make up over 45%. Among them, Pentair is the leader with about 13% market share.

Asia-Pacific is the largest market, with a share about 50%, followed by Europe and North America, with the share about 20% and 18%. In terms of product type, Diesel Engine Power occupy the largest share of the total market, about 70%. And in terms of application, the largest application is Residential, followed by Commercial.

This report studies the global Fire Pump production, demand, key manufacturers, and key regions.
