Fire-rated Medium Density Fiberboard (FR MDF) is a variant of MDF engineered to meet specific fire safety standards. It is treated with fire-retardant additives to reduce its combustibility and enhance its fire resistance.

Construction and Building Codes: Increasing demand in the construction industry, particularly for applications where adherence to fire safety regulations and building codes is essential.

Interior Applications: Usage in interior applications where fire-rated materials are required, such as wall paneling, doors, and partitions in commercial buildings and public spaces.

Architectural Specifications: Specification by architects and designers for projects that prioritize fire safety without compromising on the aesthetic and functional aspects of interior design.

Advanced Formulations: Continuous research and development to improve the fire resistance properties of FR MDF while maintaining its structural and finishing characteristics.
