The fire resistant paper faced gypsum board is a building material with high fire resistance and is commonly used in areas such as walls, ceilings and partitions that require fire protection. The core material of fire resistant paper faced gypsum boards is gypsum, with special fire resistant paper surface layers pasted on both sides, which can provide additional fire resistance. The fire resistant paper faced gypsum board adopts a special production process and formula, which makes it have good fire resistance and can withstand high temperatures for a certain period of time, thus delaying the spread of fire.

The fire resistant paper faced gypsum board has the advantages of light weight, easy construction and convenient installation. It can meet certain fire protection level requirements, and can also provide certain heat and sound insulation effects to improve the indoor environment. When using fire resistant paper faced gypsum boards, it is necessary to select the appropriate specifications and models according to the building design requirements.
