Fire-retardant silicone rubber foam is a functional elastic material made from silicone rubber as the base material through a foaming process. It possesses excellent flame retardancy, low smoke and low toxicity, resistance to high and low temperatures, and good resilience. It is commonly used in sealing, cushioning, and heat insulation applications where fire resistance and safety requirements are high.

Upstream industries mainly include silicone rubber raw materials, foaming agents, flame retardant additives, base material auxiliaries, and adhesives; downstream applications cover new energy vehicles and energy storage systems, rail transportation, electronic and electrical equipment, fire-resistant building components, and industrial safety protection.

The global price of fire-retardant silicone rubber foam is \$25 per square meter, with annual sales of approximately 25.42 million square meters and a global annual production capacity of approximately 27 million square meters. The industry profit margin is 25%.
