Abstracts

The global Fire Safety Doors market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Fire safety doors, also known as fire-rated doors or fire-resistant doors, are specialized doors designed and constructed to delay the spread of fire and smoke from one area of a building to another. They are a critical component of a building's passive fire protection system and play a vital role in safeguarding occupants and property in the event of a fire. Here are key features and functions of fire safety doors:

Fire Resistance: Fire safety doors are built to withstand exposure to fire for a specified duration, typically measured in minutes (e.g., 30 minutes, 60 minutes, 90 minutes). The fire resistance rating indicates the door's ability to prevent the passage of flames and heat.

Smoke Control: In addition to fire resistance, fire safety doors are designed to restrict the movement of smoke, which can be just as deadly as flames in a fire incident. These doors feature seals and gaskets to prevent smoke leakage.

Self-Closing Mechanism: Fire doors are equipped with self-closing mechanisms, such as door closers or spring hinges, to ensure that they automatically close and latch when not held open. This helps contain fire and smoke.

Intumescent Seals: Intumescent materials are used in the door construction, and these seals expand when exposed to heat, creating a tight seal around the door to prevent the spread of fire and smoke.

Fire-Rated Glass: Some fire safety doors incorporate fire-rated glass windows or vision panels, allowing occupants to see through the door while maintaining fire resistance.

Fire safety doors are a fundamental element of a building's fire protection plan, providing occupants with a safe means of egress and helping to prevent the rapid spread of fire and smoke. Proper installation, regular maintenance, and compliance with fire safety regulations are essential to their effectiveness in protecting lives and property during a fire emergency.
