When it comes to electrical cabinets and panels, fires are more a question of “when” rather than “if.” These fires cost businesses tens of millions of dollars a year in damages, yet fire protection for electrical cabinets is not always required by regulations. In fact, electrical cabinet fire protection is often skimped on or skipped altogether, in part due to the cost of fire suppression systems.

The three types of fire protection systems for electrical cabinets and panels are Stand alone systems, Pre-engineered Systems and Engineered Systems.
