A firefighter garment, often referred to as turnout gear or bunker gear, is specialized protective clothing worn by firefighters to shield them from the extreme conditions encountered during firefighting and rescue operations. This gear typically includes a coat and pants made from fire-resistant materials like Nomex or Kevlar, which provide thermal insulation and protect against flames, heat, and hazardous chemicals. Additional components include a helmet, gloves, boots, and a self-contained breathing apparatus (SCBA) to ensure respiratory protection in smoke-filled environments. Designed to be durable, flexible, and heat-resistant, firefighter garments are essential for safety, allowing firefighters to operate effectively in dangerous situations.
