Abstracts

The global Firefighter Helmet-mounted Camera market size is expected to reach \$ 2174 million by 2032, rising at a market growth of 9.1% CAGR during the forecast period (2026-2032).

In 2025, global sales of firefighter helmet-mounted cameras reached 1.85 million units, with an average selling price of \$620 per unit. Total global production capacity stands at approximately 2.6 million units annually, and the industry's average gross profit margin is around 42%. These cameras are professional-grade video capture and transmission devices?either integrated into protective helmets or mounted via helmet brackets?designed to record real-time footage and transmit first-person-view (FPV) information during fires, rescue operations, and hazardous incidents, thereby supporting remote decision-making at command centers. Key features include high-temperature resistance, low-light imaging, infrared-assisted identification, real-time wireless transmission, and data storage/playback capabilities; they typically feature waterproof, dustproof, shock-resistant, and heat-radiation-resistant designs to withstand extreme firefighting environments.

Upstream components include high-strength engineering plastic housings, micro image sensors, infrared modules, battery systems, and wireless communication chips; midstream operations involve professional equipment manufacturers handling optical integration, embedded system development, and protective packaging; downstream markets primarily comprise fire departments, emergency rescue agencies, industrial safety enterprises, and public safety system integrators. Future development will focus on AI-based intelligent recognition, 5G real-time data transmission, multi-device collaborative command, and the integration of AR-assisted rescue systems. Furthermore, driven by the digital transformation of global emergency management and

rising fire safety standards, the market penetration of helmet-mounted visual equipment in the smart firefighting and industrial safety sectors is expected to grow steadily.
